ME202 PROJECT

NAME – TANUSHKA KUMARI

ENTRY NO. – 2022MEB1357

COMPUTER FAN

OBJECTIVE :

The objective of computer fan is to cool the system and reduce noise. It helps to keep the temperature of the components within safe range.

DESCRIPTION:

A **computer fan** is a fan inside a computer case that works by blowing air over the components of computer to dissipate the heat. I made both the component of plastic material. Some PC's may be several fans for improved cooling performance. Computer case helps to protect the components from electrical interference, physical damage.

THANK YOU!!
